Experience

Front-end Developer at ServiceClub | Jul 2025 - now

- Development and Architecture: Design and implementation of a modular architecture with React and Next.js 15 using the Atomic Design methodology, managing monorepos with Turborepo v2. Strict typing with TypeScript, handling complex state with Redux, and efficient consumption of REST APIs using TanStack Query.
- Design System and UI: Creation and documentation of components in Storybook, using ShadCN, CVA (with typed variants in VariantProps), and cn utilities for dynamic classes with Tailwind CSS, ensuring accessibility and a pixel-perfect finish.
- Backend Autonomy and Connectivity with AI: Integration of AI tools (Cursor and Claude Code) to collaborate within the backend ecosystem by creating simple endpoints in Node.js (Hexagonal and DDD architectures), optimizing SQL databases, and modifying payloads (POST, PUT, and endpoint responses).
- Quality and Automation: Participation in the design of technical solutions and quality assurance through unit/integration testing with Jest and the React Testing Library. Version control with Git Flow and code quality automation with pre-commit hooks (Husky, ESLint v9, Prettier, and Conventional Commits).
- Methodology and Internationalization: Functional analysis and decomposition of complex tasks using the Elephant Carpaccio technique to achieve ultra-roaming value delivery. Estimation and management of workflow using Kanban boards (Trello) under Agile methodologies and internationalization of the platform with i18next.
- Technologies:
 - React, Next.js 15, TypeScript, Redux, TailwindCSS, Atomic Design, Turborepo, Storybook, ShadCN, Sonner, CVA, TanStack Query, Node.js (Hexagonal/DDD), SQL, Cursor, Claude Code, Jest, Husky, ESLint v9, Figma, Trello, i18next.

Front-end Developer and Analyst at Zityhub | Sept 2022 - jun 2025

- Architecture and development of the front-end using React and Next.js. Clean architecture and clean code following KISS, DRY and YAGNI. Connecting to REST APIs with React Query, React Hooks, managing global state with Recoil, Redux, and React contexts. Unit, integration, and E2E testing using TDD. Database modifications with MySQL. PWA. Typing with PropTypes.

- Mentoring juniors and interns. Analysis and creation of tasks to be performed. Estimation of tasks in story points based on complexity. Documentation in Confluence and Notion. Version control with Git and GitHub. Agile methodology monitoring with Scrum.
- Accessibility, responsive design, mobile-first and desktop-first approaches, layout using Styled Components, reusable components following a Design System, pixel-perfect implementation based on Figma designs.
- Technologies:
React, Next.js, JavaScript, Redux, Recoil, Styled Components, Git, Jest, Testing Library, Playwright, HTML5, Semantic HTML, CSS3 (flexbox, grid, media queries), MySQL, SQL, CircleCI, PropTypes, i18n, React Query, CSS, SCSS, Slack.

Front-end developer at Enthec | ago 2020 - sep 2022

- Creation of Front-end architecture in multiple projects. Development from scratch using Angular. Angular migrations, REST API connections, creation of guards, pipes, and directives, internationalization with i18n, forms and reactive forms, deployments with Docker and AWS, creation of technical and end-user documentation. Global state management with Redux. Interface development with TypeScript. Testing with Jest and Testing Library. Mentoring juniors. Task and project management.
- CSS architecture creation, UX/UI, accessibility, responsive design, atomic design approach, BEM methodology, use of CSS libraries (Bootstrap 4, Material Kit, Material Angular...), email templating, reusable components, generating reports and downloadable files with Handlebars (hbs).
- Technologies:
Angular (9-13), Angular Material, Sass, SCSS (variables, mixins...), HTML5, Semantic HTML, CSS3 (flexbox, grid, media queries), atomic design, BEM, mobile-first, responsive web design, Bootstrap 4, TypeScript, JavaScript, i18n, Git, GitHub, RXJS, Docker, AWS, Redux, Insomnia, Jest, Testing Library, Handlebars (hbs).

Front-end & UI Developer at Acid Tango | feb 2019 - jul 2020

- UI Development: Sass, SCSS, HTML5, CSS3, atomic design, BEM, pug, mobile first, scrum, responsive web design, accessibility, Tailwind, Semantic HTML, Vuetify, Erb, conventional commits, Bootstrap 4, CSS modules
- Front development: Vue.js, Nuxt, javascript, Single Page Applications (SPA), i18n, components, jQuery, React, React hooks, React storybook, proptypes, classnames, testing-library react, gatsby
- Technologies:

- o Sass, flexbox, git, github, responsive design, mobile first, CSS Media Queries, CSS grid layout, Sketch, Zeplin, Javascript, scrum, BEM methodology, Nuxt, HTML5, CSS3, Tailwind, Bootstrap 4, grid layout, invision, agile , jQuery, react, react hooks

UI Developer and web designer at OpenSistemas | feb 2018 – feb 2019

- Layout and web design within several pages for different clients, including companies such as BBVA, Barcelonesa, Eroski..
- Web design & layout: UX & UI. Responsive design. Sketch. Prototyping. Creation of landings. Design of pages from prototypes. Mobile-first design. Accessibility. Creation of web pages from scratch
- Technologies:
 - o HTML5 y CSS3. Responsive design. Semantic HTML. Atomic design, Bootstrap 4, sass, Flexbox, Grid, Medias Queries, Git, Github, codepen, CSS Media Queries, CSS grid layout, Sketch, Javascript, jQuery, Zeplin, scrum, taiga, Agile methodology, Mobile-first.

Languages

- **Spanish.** Native
- **English.** C1 Advanced (CAE)

Education

- **FP Web development.** Ilerna Online.
- **CAE, Certificate in Advanced English (C1).** University of Cambridge.
- Exchange with Master Global Communications and Master Spanish Journalism, research stay at Florida. Florida International University.
- **Bachelor in Advertising and Public Relations.** Universidad de Sevilla.

Others

Speaker at more than 40 Tech Conferences

- CommitConf. Accessibility and neurodivergence: Not everyone navigates the same way. Jun 2026.
- Universitat Oberta Catalunya. ARIA attributes: The Sixth sense of accessibility. May 2026
- JSConf. Web accessibility: A guide to a zombie apocalypse. Mar 2026.
- Commit Conf. I occasionally see ARIA attributes. Apr 2025.
- T3chFest. Soft Skills. How role-playing made me a better programmer. Mar 2025.

- Google Developer Groups. Workshop about Legacy code and accessibility: Improving our projects. Nov 2024.
- T3ch Fest 2024.Web accessibility: Guide for beginners. Mar 2024.

Mentor at [Step4ward](#) | sept 2023 - now

- Mentoring 17 women who want to make a change in programming or who want to advance in their career. Help with CV creation and preparation for interviews and technical tests
- Creation of mentoring events
- Selection and interviews of more than 15 new mentors

Mentor at [TechSHEssions Madrid](#) | oct 2024 - jan 2025

- Mentoring at Tech SHEssions, a free program held in Madrid, which aims to empower women to participate as speakers at technology events.

Mentor at [Adalab](#) | jul 2021 - sept 2022

- At Adalab, a tech school, experienced programmers mentor several students, helping them develop professionally by offering job search advice, preparing for interviews, practicing technical tests, and working on coding exercises

Writer of more than 50 programming articles.

- Articles on [Dev.to](#) in English and Spanish
- Articles on [Medium](#) in English
